

EXTRAER DATOS DE LA DB SEGUN QUE TRANSMISOR USA

- ingresar a la base de datos del cliente [orbitec]
- ejecutamos la consulta, el nombre del transmisor puede variar dependiendo del cual solicite el cliente

SELECT DeviceID FROM Device WHERE customAttributes LIKE '%transmisor_simpliroute=true%'

The screenshot shows a database management interface. At the top, there's a toolbar with icons for Host, Base de datos, Tabla, Datos, and Consulta. Below the toolbar, the SQL query is entered: `1 SELECT DeviceID FROM Device WHERE customAttributes LIKE '%transmisor_simpliroute=true%'`. A red arrow points from the text above to the query. Below the query, the results are displayed in a table titled "Device (38r x 1q)". The table has one column, "DeviceID", and lists several IDs: bcc-852, bcc-853, bcc-903, bcd-702, bcd-733, bcd-734, and bcd-772. A red arrow points from the text above to the first row of the table.

DeviceID
bcc-852
bcc-853
bcc-903
bcd-702
bcd-733
bcd-734
bcd-772
